

Tillamook County Community Health Centers Public Health Nursing

Do you enjoy connecting with individuals and want to make a positive impact on the health of your community? Consider a career in Public Health Nursing! We're accepting applications for a **Registered Nurse 3 to work in Public Health.**

A Public Health Nurse provides care to clients in the home, clinic, and community setting through direct care, health promotion education, referrals, and supporting community connections. The Public Health Nurse works together with individuals, families, groups, communities, and organizations to provide the [10 Essential Public Health Services](#).

Essential Duties

- ◆ Direct case management of pediatric and adult clients ensuring appropriate referrals and connection to services.
- ◆ Prenatal and postnatal outreach, screening, care, lactation support, and education.
- ◆ Infant and pediatric; outreach growth and development screening, nursing interventions, health and development education, well child assessments, infant feeding assessments, and immunizations.
- ◆ Effectively utilize nursing assessments; formulate, apply, and monitor nursing care plans.
- ◆ Utilize agency standing orders and protocols to counsel and administer appropriate immunizations.
- ◆ Provide counseling and education in an individual or group setting in the areas of chronic health conditions such as prevention and management of diabetes, drug and alcohol abuse, and high blood pressure. Communicable disease such as Coronavirus, TB, STI, and other reportable conditions.
- ◆ Provide communicable disease services by partnering with State and local health agencies, hospitals, and health clinics to monitor, track, and investigate communicable diseases. Provide education, investigative, and treatment services as needed to individual clients.
